**Description:**

*Java How to Program (Late Objects), Tenth Edition* is intended for use in the Java programming course. It also serves as a useful reference and self-study tutorial to Java programming.

The Deitels' groundbreaking *How to Program* series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. **Java How to**

**Program (Late Objects), Tenth Edition**, teaches programming by presenting the concepts in the context of full working programs.

The **Late Objects Version** delays coverage of class development, first presenting control structures, methods and arrays material in a non-object-oriented, procedural programming context.

### Teaching and Learning Experience

This program presents a better teaching and learning experience—for you and your students.

- **Teach Programming with the Deitels' Signature Live Code Approach:** Java language features are introduced with thousands of lines of code in hundreds of complete working programs.
  - **Use a Late Objects Approach:** The **Late Objects Version** begins with a rich treatment of procedural programming, including two full chapters on control statements and 200+ exercises.
  - **Keep Your Course Current:** This edition can be used with Java SE 7 or Java SE 8, and is up-to-date with the latest technologies and advancements.
  - **Facilitate Learning with Outstanding Applied Pedagogy:** Making a Difference exercise sets, projects, and hundreds of valuable programming tips help students apply concepts.
  - **Support Instructors and Students:** Student and instructor resources are available to expand on the topics presented in the text.
